

INTRO TO R WORKSHOP

Workshop Name: Introduction to R Continued

Instructors: Marisa Eisenberg, Jules Gilbert

Date: 6/27/25, 2-4pm

Project Overview

MICOM's free R programming workshops support public health efforts and strengthen ties with local health departments.

Held at the Livingston County Health Department, this Introduction to R workshop welcomed 16 participants from seven southeastern Michigan health departments. This course focused on building foundational skills in the R programming language.

Objectives

- Facilitate hands-on experience using the R application
- Equip participants with foundational R skills relevant to LHD work
- Observe increased knowledge and skills using R via post-workshop survey
- Foster relationships with local health departments/staff members

Deliverables

- Flyer advertising the workshop
- Registration form collecting participant contact information, health department affiliation, and R experience level
- Pre-Workshop communication bundle with R installation instructions
- Pre-Workshop virtual office hour for participant questions
- Workshop slideshow presentation
- Worksheet for participant use during the session
- Post-Workshop communication bundle including participant survey & workshop slides
- One-Pager project brief

Project Team

- ✓ Project Coordinator
- ✓ Support Analysts
- ✓ Workshop Instructors

Future Considerations

- Consider extending duration of workshops
- Recognize introductory R courses can be challenging for instructors to facilitate due to time limitations and the diverse range of participants' skill levels
